

5-151 Clip-on Sealing Profiles

EPDM / NBR

Clip-on profiles combine the characteristics of edge protection profiles and sealing profiles.

- Clip-on sealing.
- The sealing part of these profiles is made of EPDM sponge rubber and the clamp area consists of soft rubber with a steel EPDM clip-on core.
- In an extrusion process the two materials are bonded to each other through vulcanization.
- The profiles made of NBR are oil resistant.
- Tested according to UL Standards.

Customized designs:

- If the cross-sections shown here are not suitable for your specific application, we can produce a customized profile to meet your needs.
- Sealing Profile also available in UL tested material (UL94 HB).

Material:

- **Clip-on profiles:** EPDM or NBR
- **Carrier:** soft rubber
- **Sealing part:** Sponge rubber
