

1-270.02 Spring-Loaded Flap Lid Pr20.1

Advantages

- Enclosing flap provides protection against soiling.
- When using the spring-loaded flap lid, the flat external seal can be omitted (flap lid has sealing lips).
- The spring-loaded, enclosing flap falls back into the closed position at any time after operation and thus reliably protects against dust and water.
- Retrofittable for quarter-turns with insert and cylinder quarter-turns.
- For head diameter max. 32mm and head height 6mm.
- 180° Opening angle.
- Integrated stop protects the quarter-turn surface from damages.

Materials

Lid and bottom: PA, black
Knurled pin and leg spring: stainless steel

Remarks

Complete tightness of the Quarter-Turn is not achieved with the spring-loaded flap lid alone!

When using the spring-loaded flap lid the H-dimension changes by 2mm!

Integrated finger pull allows easy handling also with work- or safety gloves.

1. Sealing lip
